

Dresser Roots Shanghai, China Service Center assembles blower packages, restores blowers to peak performance and provides service for longer life.

Blower Packages

Dresser Roots maintains a 10,000 square foot facility in Shanghai, China for blower package assembly, factory service and repair. At this facility, we assemble pre-engineered packages using ROOTS™ bareshaft blowers manufactured in the USA. All other package components, including motor, enclosure, baseframe, and silencers are sourced locally against the exacting QA standards established by the Roots factory engineering team. All local package designs are in line with Roots USA engineering specifications and the standard EasyAir® X2 packages, are effectively interchangeable.

Quality Repairs

Roots returns your equipment to peak efficiency and full service life by providing well-trained, experienced craftsmen working in strict accordance with factory repair guidelines.

Regardless of any harsh conditions and length of service your unit has endured, we can restore it to original factory specifications.

Providing the Proper Service

The Dresser Roots Shanghai facility has been accorded ISO 9001 and 14001 certification. These activities assure you of optimum performance from our packages and from blowers we service or repair.
