

FOR IMMEDIATE RELEASE

**New Tri-Lobe Rotary Air Blowers
Provide Quieter Operation and Reduced Vibration**

Houston, Texas (August 3, 2007) - A new line of tri-lobe rotary air blowers, re-designed to incorporate the latest technology for reduced noise and vibration, has been introduced by Dresser Roots, a division of Dresser, Inc.

The ROOTS™ RAM-X™ blowers have an exclusive WHISPAIR™ discharge design. This unique design, when combined with the tri-lobe impellers, delivers air with reduced pulsation, less vibration, and quieter operation than conventional tri-lobe blowers. Reduced pulsation transmits less shock to the bearings, extending bearing life.

All model sizes incorporate detachable steel mounting feet to adapt to horizontal or vertical configuration. Further, a drive shaft extension allows top or bottom drive.

The blowers are based on over 93 years of proven tri-lobe technology and performance. Dresser Roots introduced the tri-lobe blower technology in 1914, and is the oldest continuous manufacturer of rotary-lobed blowers.

For more information about the new ROOTS™ RAM-X™ Tri-Lobe Air Blowers, contact Dresser Roots at 877-363-ROOT(S).

###

About Dresser Roots

Dresser Roots, a division of Dresser, Inc., is a leading supplier of ROOTS™ rotary positive blowers and centrifugal compressors systems. ROOTS® air and gas moving equipment is used in a wide variety of applications, including wastewater treatment, flue gas desulphurization, petrochemical and chemical processes, and other general industrial applications.

About Dresser, Inc.

Dresser, Inc. is a leader in providing highly engineered infrastructure products for the

global energy industry. The company has leading positions in a broad portfolio of products including valves, actuators, meters, switches, regulators, piping products, natural gas-fueled engines, retail fuel dispensers and associated retail point of sale systems and air and gas handling equipment. Leading brand names within the Dresser portfolio include Dresser Wayne® retail fueling systems, Waukesha® natural gas-fired engines, Masoneilan® control valves, Mooney® regulators, Consolidated® pressure relief valves, and ROOTS® blowers and rotary gas meters. It has manufacturing and customer service facilities located strategically worldwide and a sales presence in more than 100 countries. The company's website can be accessed at www.dresser.com.
